SHEEP KILLED BY SALE.— Charles E. Crane of Bridport, Vt., asks if we can "give any information respecting the disease in sheep which is caused by eating salt after being for some days without." He says he has lost several from that cause: that they usually die within 36 hours after eating the salt ; and that the most prominent symptoms are a violent shivering of the whole body, and difficult respiration as the case advances. We have never seen a case of this kind, but we have often heard of them. An excessive amount of salt is liable to produce inflammation of the interior lining-mucous membrane-of the stomach, and this is doubtless the disease in question. To arrest the corrosive action of the salt and put it in a form to be carried off, it would be proper immediately to administer lukewarm water, say a quart. Stirring the whites of three or four eggs in the water would render its effect more excellent remedy. If administered properly and in time, either of the remedies proposed would probably be effective,-Homesteed.

A WRINKLE ABOUT THE AGE OF Houses.-A short time ago we met a gentleman from Illinois, who gave us a ty, and with no adulteration whatever. Its preparapiece of information in regard to ascertaining the age of a horse, after he or new to us, and will be, we are sure, to most of our readers. It is this: after the horse is nine years old, a wrinkle comes on the evelid at the upper corner of the lower lid, and every year thereafter he has one well defined wrinkle for each year over nine. If, for instance, a horse has three wrinkles, he is twelve: if four, he is thirteen. Add the number of wrinkles to nine, and you will always get it. So says the gentleman; and he is confident it will never fail. As a good many people have horses over nine, it is easily tried. If true, the horse dentist must give up his trade.-Farm and Fire-

GOOD MILKERS .- Col. Isaac Woodman, a stock raiser and dairyman of Searsmont, Me., is reported in the Tribone to have said that, as the result of forty years' experience, the heifer whose first calf is a bull never proved to be much of a milker; but if her first proluct was a heifer, she was pretty sure to eproduce all the milking qualities of her mother, however excellent they may have

Readings for Young Men.

Under this head we propose to insert, from time to ime, extracts from a London book, which we trust will ACTIVITY IS NOT ALWAYS ENERGY.

There are some men, whose failure to succeed in life is a problem to others, as well as themselves. They are industrious, prudent, and economical: yet, after a long life of striving, old age finds them still poor. They complain of ill-luck. They say fate is always against them. But the fact is, they miscarry because they have mistaken mere activity for energy. Confounding two things essentially different, they have supposed that, if they were always busy, they would be certain to be advancing their fortunes.

They have forgotten that misdirected labour is but a waste of activity. The a marksman firing at a target; if his Boston, Mass. shots miss the mark, they are a waste of powder: to be of any service at all, they must tell in the bull's-eve, or near. So, in the great game of life, what a man does must be made to count, or it had almost as well been left undone

YOUNG AMERICA. To Breeders of Trotting Horses The fast and famous trotting Stallion YOUNG AMERICA, by Heagland's Gray Messenger, dam by old Al-dallah, will stand for the season at the Wind-

ham County Park, Brattlebore, Vt. YOUNG AMERICA is a handsome, powerful horse, eight years old, fifteen hands three inches high, and weighs 1,250 pounds. He is iron gray, with black points a splendid trotter, and the sire of some of the mospromising colts in the whole country. He trotted when two years old, two races on the Centreville Course, Long Island, against Lady Bevins and Rocky Hill, winning every heat with case, and making his mile in three ninutes and three seconds (3.03), the best time on record for a two-year old. He can now show a 2,30 gait though only driven for exercise. His progeny cannot be excelled, as shown by the fact that, at the fair of the New England States, held last fall, his colts at (3) three years old, took the first and second premiums. One of lions, and all the broad mares of trotting blood that re illustrated. Price 1.75 by mail. MILTON BRADLLY crived premiums had feels at their side got by YOUNG AMERICA.

> Young Anerica. We are satisfied that in this young horse the breeders of New England have a stalion of very great value to their section of the country He comes on both sides from pure natural trotting famil-its, both of which were remarkable for their stoutness, as well as the speed of their stock. lood, and we think if the stallion had been trained til now he would have been se fast as she is. We have urged his owner to bring him back to the island, and let him have a serson on the course. He beli ves with us that the horse would distinguish himself, and would as the him the opportunity to do so. But his services at the stud are so highly estermed, and his positive have already displayed such fine points and such superior speed and action, that he cannot be spared from the sud. He may, however, leave the neighborhood at some date, and meantime, if we lived near him and had a good mare we would certainly dip into the Gay Mes-enger and Abdallah blood, of which he is the
